## C.L.E.A.R Observation Deck- CONCEPT PLAN

Cheat Lake Environment and Recreation Association proposes the addition of an observation deck to the existing rail trail. The deck would provide visual access to Cheat Lake for visitors of the trail. It would also provide a location for picnicking, relaxing, and resting along the trail. The deck adds another amenity to the existing public boat landing just below. Building the deck in phases allows for envisioning additional deck areas moving out over the lake providing more expansive views.

Drawings are not to scale and are not appropriate for use as construction documents.
