

Want to save some \$\$\$?

Join us for a *free* hands-on energy home energy efficient workshop

- Learn how to seal and insulate around rafters and vents

- See how air moves through a structure and how to find/address common leakage areas

- See “behind” the walls to better understand how to safely and effectively insulate them.

- Learn full explanations of basic building science and safety precautions.

Workshops are focused on helping work-camps efficiently complete energy related home repair work in West Virginia this summer.

Date: October 5th, 2013

Time: 9am-4pm

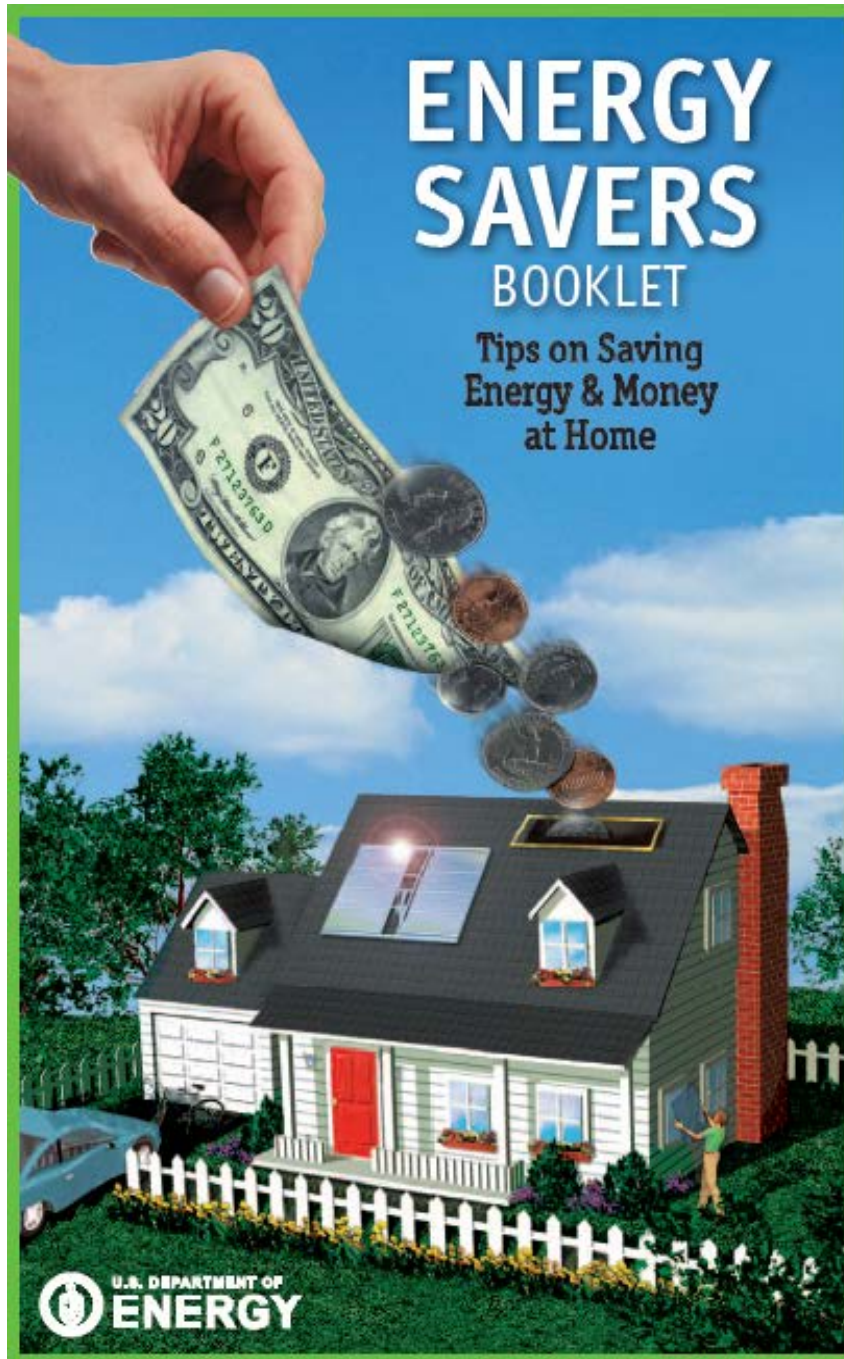

Location: Glenmark Center Lowes
